

**AMENDMENTS TO THE CLAIMS**

**Please cancel claim 40 without prejudice or disclaimer and amend claims 33, 35, 38, 41, 42, 45, and 46 as follows:**

1. – 32. (Canceled).

33. (Currently Amended) An information storage medium for use with a reproducing apparatus providing a visual display of interactive graphics, the information storage medium comprising:

an audio-visual (AV) data stream; and

a plurality of interactive graphics streams corresponding to the audio-visual data stream, which are used to control reproduction of the audio-visual data stream;

wherein:

each of the plurality of interactive graphics streams corresponds to a different one of a plurality of languages, and can be reproduced by the reproducing apparatus with the audio-visual data stream;

one interactive graphics stream among the plurality of interactive graphics streams is selected by ~~attribute information~~ an interactive graphics stream number stored in a player status register in the reproducing apparatus; and

the selected interactive graphics stream is reproduced by the reproducing apparatus together with the audio-visual data stream.

34. (Canceled).

35. (Currently Amended) An apparatus to provide a visual display of interactive graphics using an audio-visual (AV) data stream and one of a plurality of interactive graphics streams corresponding to the audio-visual data stream stored on an information storage medium, the apparatus comprising:

a processor to obtain ~~attribute information~~ an interactive graphics stream number from a player status register in the apparatus; and

a decoder to select one interactive graphics stream corresponding to the obtained ~~attribute information~~ interactive graphics stream number from among the plurality of interactive graphics

streams stored on the information storage medium, and reproduce the selected interactive graphics stream together with the audio-visual data stream;

wherein:

the plurality of interactive graphics streams are used to control reproduction of the audio-visual data stream; and

each of the plurality of interactive graphics streams corresponds to a different one of a plurality of languages and can be reproduced with the audio-visual data stream.

36. (Canceled).

37. (Previously Presented) The apparatus of claim 35, wherein the processor executes a program object comprised of navigation commands that is related to the audio-visual data stream to enable the selecting of the one interactive graphics stream.

38. (Currently Amended) The apparatus of claim 35, wherein the processor loads and executes an interactive graphics stream change program included in the one interactive graphics stream that is being reproduced, and reads and reproduces another interactive graphics stream selected according to new ~~attribute information~~ interactive graphics stream number obtained by executing the interactive graphics stream change program.

39. (Previously Presented) The apparatus of claim 38, wherein the interactive graphics stream change program is a button command included in a button object.

40. (Canceled).

41. (Currently Amended) The information storage medium of claim 33, wherein if the plurality of interactive graphics streams do not include an interactive graphics stream corresponding to the obtained ~~attribute information~~ interactive graphics stream number, the reproducing apparatus stores a stream number of a predetermined interactive graphics stream of the plurality of interactive graphics

streams in the player status register in the reproducing apparatus, and reproduces the predetermined interactive graphics stream together with the audio-visual data stream.

42. (Currently Amended) The apparatus of claim 35, wherein if the plurality of interactive graphics streams do not include an interactive graphics stream corresponding to the obtained ~~attribute information~~ interactive graphics stream number, the processor stores a stream number of a predetermined interactive graphics stream of the plurality of interactive graphics streams in the player status register in the apparatus, and the decoder reproduces the predetermined interactive graphics stream together with the audio-visual data stream.

43. (Previously Presented) The information storage medium of claim 33, wherein each of the plurality of interactive graphics streams comprises information required to provide a graphical interactive display and associated commands of the graphical interactive display.

44. (Previously Presented) The apparatus of claim 35, wherein each of the plurality of interactive graphics stream comprises information required to provide a graphical interactive display and associated commands of the graphical interactive display.

45. (Currently Amended) The apparatus of claim 35, wherein the processor provides the ~~attribute information~~ interactive graphics stream number in the player status register to the decoder.

46. (Currently Amended) The apparatus of claim 35, wherein the ~~menu language information is recorded in player status register number 18, and an~~ interactive graphics stream number is recorded in player status register number 0.
